

*These are the most popular
skates in the world*

SKATING IS EASIER for novice or expert on Nestor Johnson skates—easier because genuine JOHNSONS are skilfully designed for correct balance and radius—easier because they are designed to meet the widely different requirements of men, women and children. There is a distinctly different type of Nestor Johnson skate for each.

The shoes are specially designed for the different types of Nestor Johnson skates — made over different lasts to meet the normal foot requirements of men, women and children and properly attached to the skates—a balanced combination that makes skating easier.

The famous Nestor Johnson **DIAMOND-TEST** insures steel-hardness — runners stay sharp longer.

"Natural-Form" **ARCH SUPPORT**—keeps foot in normal position, for effortless skating.

A different **SKATE HEIGHT** for men, for women, and for children, assures greatest ease in skating.
